Spare part kits

– what you need, when you need it

We have assembled complete spare part kits containing all parts that should be replaced after a certain number of running hours/years.

Why buy spare part kits?

- Lower price than when purchased item by item.
- Time saved on ordering, storing and locating parts.
- All necessary parts - and no unnecessary parts.
- Original TMC parts for safety.
- No unscheduled stops due to missing parts.
- Simplified service planning, no down-time.
- Instructions for changing the parts included.

For safety at sea choose original TMC parts

Considering the high temperature, high pressure and extreme conditions at work in a compressor onboard a ship, every detail counts. That is why TMC pays attention to every little detail on the parts. Factors such as glue types, coatings, filter walls, and types of metals, etc. may seem insignificant, but are crucial for reliable and safe operation.

The TMC warranty is valid only if original TMC parts are used. Original parts mean lower running costs as well as peace of mind at sea. Our profile makes TMC parts easy to recognize. The distinctive TMC packaging gives you the assurance that you have received top-quality original parts based on our specifications and our unrivalled experience in marine screw compressors.
